Please read right through the information on the outside and inside of this pack before you start using this medicine.

If you have any questions, or if there is anything you do not understand, ask your pharmacist.

WHAT ARE THEY FOR?

Panadol ActiFast has a unique formulation which gets to the source of pain fast. It acts faster than standard paracetamol tablets you can swallow to give fast pain relief of headaches, including migraine and tension headaches, toothache, backache, rheumatic and muscle pain and period pain. It also relieves sore throat and the fever, aches and pains of colds and flu.

TAKE SPECIAL CARE

Ask your doctor before you take this medicine:

- if you have liver or kidney disease, including alcoholic liver disease
- if you are on a controlled sodium diet (see Section 2 inside for more information).

HOW TO TAKE

Adults and children aged 16 years and over:

Swallow 2 tablets with half a glass of water (100 ml), every 4 hours as needed. Do not take more than 8 tablets in 24 hours.

Children aged 12-15 years:

Swallow 1 tablet with half a glass of water (100 ml), every 4 hours as needed. Do not give more than 4 tablets in 24 hours.

Do not take more frequently than every 4 hours.

Do not take more than the recommended dose.

Do not give to children under 12 years of age.

Do not take more medicine than the label tells you to. If you do not get better talk to your doctor.

WARNING: Talk to a doctor at once if you take too much of this medicine, even if you feel well. This is because too much paracetamol can cause delayed, serious liver damage.

Contains paracetamol. Do not take anything else containing paracetamol while taking this medicine.

INGREDIENTS

Each tablet contains Paracetamol 500 mg. Sodium content 176mg per tablet. Do not store above 25°C.

Keep out of the sight and reach of children.

1. WHAT PANADOL ACTIFAST DOES

Panadol ActiFast has a unique formulation which gets to the source of pain fast. The active ingredient is paracetamol which is a painkiller and also reduces your temperature when you have a fever.

2. CHECK BEFORE YOU TAKE PANADOL ACTIFAST

Do not take Panadol ActiFast:
• if you have ever had an allergic reaction to paracetamol or to any of the other ingredients (listed in Section 4).

Ask your doctor before you take this medicine if you:
• need 2 or more tablets daily for a prolonged period, especially if you have been advised to follow a low salt (sodium) diet. Each tablet contains 176 mg of sodium.

- have liver or kidney problems
- are underweight or malnourished
- regularly drink alcohol
- have a severe infection as this may increase the risk of metabolic acidosis. Signs of metabolic acidosis include:
 - deep, rapid, difficult breathing
 - feeling sick (nausea), being sick (vomiting)
 - loss of appetite

Contact a doctor immediately if you get a combination of these symptoms. You may need to avoid using this product altogether or limit the amount of paracetamol that you take.

If you are taking other medicines

Talk to your doctor or pharmacist before taking these tablets if you are taking any prescribed medicines, particularly metoprolamide or domperidone (for nausea (feeling sick) or vomiting (being sick)) or colestyramine (to lower blood cholesterol). If you take blood thinning drugs (anticoagulants e.g. warfarin) and you need to take a pain reliever on a daily basis, talk to your doctor because of the risk of bleeding. But you can still take occasional doses of Panadol ActiFast at the same time as anticoagulants.

Pregnancy and breast feeding. Talk to your healthcare professional before taking Panadol ActiFast if you are pregnant. You can take this product whilst breast feeding.

3. POSSIBLE SIDE EFFECTS

Like all medicines, Panadol ActiFast can have side effects but not everybody gets them. A small number of people have had side effects. Very rare cases of serious skin reactions have been reported. Stop taking the medicine and tell your doctor immediately if you experience:

- Allergic reactions which may be severe such as skin rash and itching sometimes with swelling of the mouth or face or shortness of breath
- Skin rash or peeling, or mouth ulcers
- Breathing problems. These are more likely if you have experienced them before when taking other painkillers such as ibuprofen and aspirin
- Unexplained bruising or bleeding
- Nausea, sudden weight loss, loss of appetite and yellowing of the eyes and skin.

If your symptoms continue or your headache becomes persistent, see your doctor.

Reporting of side effects If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the Yellow Card Scheme at www.mhra.gov.uk/yellowcard or search for MHRA Yellow Card in the Google Play or Apple App Store. By reporting side effects, you can help provide more information on the safety of this medicine.

4. FURTHER INFORMATION
